21 January 1958.

Dear Lederberg,

The note to Nature "Bacterial Protoplasts" has now gone in to the Editor signed by : Dark, Gerhardt, Jaynes, Kandler, Kellenberger, Klieneberger-Nobel, McQuillen, Rubio-Huertos, Salton, Strange, Tomcsik, Weibull, Brenner.

It is much as the last draft you saw.

I hope that it will achieve something - at least it has caused some of us to consider these matters more deeply.

All good wishes,

  
Kenneth McQuillen

May I say how extremely interesting I find your paper (to be published in J. Bact.) on "protoplasts" and L-forms in coli.
